

HALO SERIES TOP BURNERS

The Robertshaw® Halo Series Top Burners is designed to deliver premium performance (time to boil and consumer union simmer testing), easy assembly, and minimal components. The Halo Top Burner also offers custom trim levels.

Features and Benefits

- Sealed burner construction
- Primary air from below the cooktop
- Three physical sizes with approximate burner ratings of:
 - 8,000 to 10,000 BTUs Low Turn Down Simmer flame rating of 800
 - 12,000 to 15,000 BTUs Low Turn Down Simmer flame rating of 1000
 - 17,000 to 20,000 BTUs Low Turn Down Simmer flame rating of 1320
- Non-removable burner head construction
- Side feed orifice holder with rail mounting holes
- Electrode mounts to the orifice holder and is accessible from the top of the appliance
- Standard ignition or re-ignition without changing any components
- Two sheet metal cutouts including orifice holder mounting screw holes (medium and large burners use common cutout)
- Exceptional time to boil
- All burners pass the chocolate test
- Burner base material: Die cast aluminum (A380)
